EDUCATION

PGDM (Finance)

Mumbai University

June 2023

OBJECTIVE

Skilled PHP/Laravel Developer with 2 years of experience building robust, scalable, and secure web applications. Proficient in developing RESTful APIs, optimizing database performance, and integrating third-party services. Passionate about clean code, best practices, and delivering high-quality solutions that enhance user experience.

SKILLS

Languages: HTML, CSS, Bootstrap, JavaScript, PHP, Laravel, Wordpress, Mysql, MongoDB

Tools: Git/GitHub, POSTMAN, VS Code, AWS

PROJECTS

FitasF-Expo | *Laravel, JWT Token, APIs, MSG91-Email, MSG91-SMS, Git, VS Code*

- Laravel Backend Project: Developed a multi-user login admin panel for an event management system. In this project, a super admin can create events and assign users to specific events. Each user can log in based on their assigned event and update participant details accordingly.
- Technologies and Features: Implemented secure APIs using JWT tokens for authentication, integrated MSG91 for sending emails and SMS notifications, and utilized the maatwebsite/excel package for handling Excel file operations. The project uses MongoDB for database management and Redis for caching to optimize performance and scalability.

Max Easy Store Portal | *Laravel, Passport Token, APIs Excel, Git, Mailer, Cron Jobs, VS Code*

- Laravel Backend Project: Built a multi-user login admin panel where users log in based on their roles to manage retail shopping operations. The system tracks purchases, and every retailer and their associated users earn commissions according to their roles, distributed 45 days after each transaction.

Panamedia | *PHP, Wordpress, Git, VS Code*

- WordPress Plugin Development: Created a custom plugin for model registration, allowing aspiring models to sign up for modeling contests directly through the website. After completing the registration, admins can log in to the admin panel to approve or disapprove the model applications. Approved models are then displayed on the official website, showcasing them to visitors and contest organizers.

Panamedia | *PHP, Wordpress, Git, VS Code*

- WordPress Product Creation and Dispatch Portal: Developed a role-based multi-user portal to handle product sales and distribution. Users can log in according to their roles, such as manufacturer, wholesaler, retailer, or customer. Each user role has specific access to create, manage, or track product orders, ensuring seamless coordination across the sales and dispatch process.

uDare | *PHP, Laravel, Git, VS Code, stripe*

- uDare is an all-in-one sports application designed to connect sports enthusiasts with venues and fellow players. Available for iOS and Android devices, it offers features such as instant booking of sports venues, the ability to join or initiate games, and options to invite friends or find new playpals nearby.

Contribution Projects | *PHP, Laravel, Wordpress, Git, VS Code*

- Fitasf, BMW Vehicle Recall, Fitlab, Loksabha Portal

EXPERIENCE

Techiebears Pvt Ltd | *PHP/Laravel Developer*

Involved in the php or laravel backend developer
